

Monica Jong
Australia

Dr. Monica Jong is the Global Director of Professional Education, Myopia at Johnson & Johnson Vision where she leads practitioner education initiatives around the world to support evidence-based myopia management. She was the former Executive Director of the International Myopia Institute, an organization she helped found and lead. In this role she led the development of white papers and key initiatives to bring consensus to the field of myopia management by bringing together leading researchers, clinicians, educators, policy-makers and public health experts. Monica has published numerous peer reviews articles, co-created the first global online education program in myopia at the Brien Holden Vision Institute, co-authored the WHO report on the Impact of Myopia and High Myopia. Monica was the former secretary of the Refractive Error Working group of the International Agency for Prevention of Blindness (IAPB) and contributed to position papers in uncorrected refractive error. Monica speaks regularly at scientific and practitioner meetings in myopia and refractive error. She also enjoys lecturing and mentoring graduate students in her spare time.
