

Weizhong Lan
China

Dr. Weizhong Lan is a full professor in Central South University, China and the vice director of Aier Institute of Optometry and Vision Science, Aier EYE Hospital Group. He finished his clinical training as an Ophthalmologist in Zhongshan Ophthalmic Center (China) and achieved his M.D / Ph.D of Neuroscience in University of Tuebingen (Germany). His main interest is to understand the pathogenesis of myopia and to develop new approaches to correct and control myopia. He has led more than 10 clinical trials investigating the efficacy and safety of anti-myopia interventions. He is also the co-inventor of the first wearable device to collect myopia-related environmental factors in the world, called Clouclip®. Recently he and his team just won the bid of hosting the International Myopia Conference (IMC) 2023 in China.

Topic: Plenary session 4: Natural classroom to arrest myopia: design and baseline characteristic
